- 2000 - 01** Terranova Arquitectos, Guadalajara, Mexico
- 2000** ARG + CEQ Arquitectos, Guadalajara, Mexico
- 1998 - 00** Diseño Integral Arquitectónico, Guadalajara, Mexico

Summary of Experience

Georgina's experience working with Rogers Stirk Harbour + Partners has ranged from early years spent in masterplanning and housing, and later moving into a more specialised practice in high rise building design and airports.

Georgina is currently involved in RSHP's Taoyuan Airport, Terminal 3 project in Taiwan, won in competition in 2015 where she is responsible for the overall project co-ordination with emphasis on the design of the Multifunctional building as part of the Terminal 3 development. This is a mixed-use development providing 200,000 m² of office space, hotel and retail.

Her role during the concept design stage for World Trade Center Tower 3 in New York in 2006, developed into team leader for the later stages of the design, coordinating the design with the client and consultants internationally. She subsequently got involved in office buildings in London, Chongqing, Washington DC, Mexico City and Bogota.

Georgina played a key role in the design coordination and client liaison for the BBVA Tower in Mexico City. During her four years as project architect, from early competition stages, she spent two years in Mexico collaborating directly with the client body and the local partner Legorreta. During this time she was integral to the design development and coordination and its implementation on site. Georgina played a key role in the design coordination and client liaison for the BBVA HQ Tower in Mexico City.

More recently, her experience in high rise design has made her a key participant in Atrio, the ongoing project for two high-rise office buildings in Bogota, with one of them now under construction. Her initial involvement in the delivery of the façade and structural packages, was followed by a more general client liaison and coordination role with the executive architect for the later stages of the design and construction documents.

Key Projects

- 2016 –** Taoyuan Airport Terminal 3, Taiwan
- 2014-** 15 Atrio, Bogota, Colombia
- 2014-** Atrio, Bogotá, Colombia
- 2014** Mexico City New Airport, Mexico City, Mexico
