Summary of Experience

Lennart Grut is the partner in charge of managing the practice's key international projects. Lennart has worked at RSHP for three decades and his role includes organising and managing multidisciplinary teams in multilingual environments to ensure delivery of projects. Working within a wide variety of cost and time constraints, he is responsible for ensuring the exacting quality standards set by the practice are met.

He has particular expertise in the planning and design of major airport projects and has been director in charge of Terminal 5, Heathrow Airport, London and Terminal 4, Barajas Airport, Madrid, winner of the 2006 Stirling Prize. Current airport projects include major extensions at Geneva and Lyon Airports.

He has been involved in setting up the practice's new work in Mexico, Lebanon, China and South America. Projects include the new Headquarters for BBVA in Mexico City and two new mixed-use towers in Bogota that aim to be a catalyst for regenerating the old CBD Centre Internacional area. There are also projects in Beijing, Shanghai, and Chongqing in China as well as Taipei and Singapore. Lennart also helps RSHP to maintain a continued presence in Europe, in particular Italy and France where we currently have projects in Naples, Scandicci, Paris and Lyon. In addition, Lennart oversees the IT department ensuring it remains at the forefront of architectural innovation.
